

Shaping a healthier future

Fortifying school nutrition management system (SNMS)

Blending advanced tech with social responsibility, our work transcends traditional software services, fostering a secure, health-conscious and interconnected educational environment.

Overview & significance

Customer snapshot
 Leading provider of school nutrition software in the USA

Initial project scope
 Maintenance and support for on-prem legacy system

Standout factor
 The trust of the client led to a long-term engagement focused on ongoing value addition

Project triumphs

41% reduction
in time to market

Defect-free
releases

Evolved into a key strategic partner
supporting R&D activities

Challenges

Creating scalable automation testing frameworks & accelerators

Ensuring continuous, multi-faceted value addition

Personalizing the software for diverse student demographics

Innovating adaptive and robust enhancements

No margin for error demanding unwavering accuracy & precision

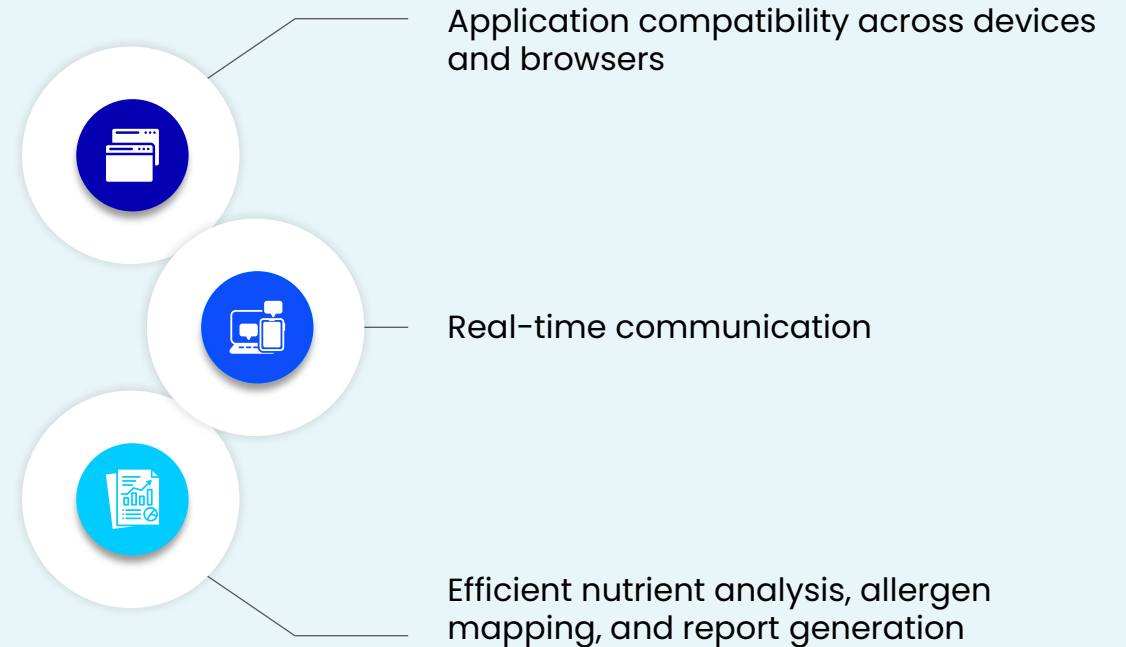

IV's methodology

- Selenium-based test automation framework
- End-to-end validation and mapping
- Step-by-step guide for parents
- Fully integrated inventory management system

Technology utilized

- Asp.NET Core version 6.0
- C#
- SQL Server 2008

Solution targets & achievements

Originating as a testing service provider, we've evolved into an indispensable strategic ally, instrumental in bolstering research and development endeavors.
